

MAN BIRD SOARS O'ER EIFFEL TOWER

Count De Lambert in a Wright Bi-plane Thrills Parisians by His Daring Flight.

THOUSANDS COULD BARELY CREDIT THEIR SENSES

Sensation Created More Profound Wonder Than When Santos Dumont Circled Structure in 1900—Orville Wright and Sister Wring Hands of the Aviator.

Paris, Oct. 20.—Count De Lambert, the French aviator, just before dark tonight accomplished one of the most remarkable and daring feats yet to the credit of heavier-than-air machines. Starting from the aerodrome at Juvisy in a Wright biplane he flew to Paris, a distance of about thirty miles. After manoeuvring over the city at an average height of four hundred feet, he ascended in gradually diminishing circles and passed several hundred feet above the Eiffel tower. He then returned to Juvisy.

Thousands who watched from the streets of Paris could barely credit their senses when they saw the aviator, a tiny object gliding swiftly far above the tower, and the sensation created here by this performance was more profound than when Santos Dumont circled the structure in his dirigible balloon in 1900.

Count De Lambert was given a tremendous ovation on his return to Juvisy. Orville Wright, who was present with his sister, rushed forward and wrung the hands of the aviator as he alighted.

QUEBEC HAS \$1,000,000 FIRE TAFT "LOADING" ON RANCH

Buildings Full of Goods for Ocean Going Vessels—\$250,000 Worth of Butter Lost.

Quebec, Que., Oct. 17.—The loss from the fire which swept Quebec's waterfront last night and early today will exceed \$1,000,000. Besides the Canadian Northern railway elevator, where the fire originated, the Redford line steamer sheds, the harbor commissioners' sheds, a cold storage building and the customs house were burned. All the buildings were full of grain and goods awaiting shipment on ocean going vessels.

The work of the firemen was greatly hampered by inability to get their apparatus near the fire and had it not been for the wrecking Strathcona, the blaze might have spread across the Lake Louise basin to the Canadian Pacific railway sheds and the immigration buildings.

The Canadian Northern elevator was insured for \$250,000 and contained 140,000 bushels of wheat. The burned sheds were insured for \$50,000. The loss will be principally on their contents. One Montreal firm alone had \$250,000 worth of butter stored in the cold storage building awaiting shipment.

RUTLAND'S BOY CRIMINAL.

David Bombard, 16 Years Old, Has Remarkable Record.

Rutland, Oct. 18.—David Bombard of this city, 16 years old, is rapidly accumulating a long criminal record. Yesterday while Mrs. John Lyndon was at church the lad entered her house through a window, getting away with three bank books, some small change and a number of receipts. When he returned for some comfort money he was seen and an officer was notified. While trying to evade the officer Bombard ran into a wire fence and lost one of his trousers.

Not long ago Bombard was first arrested in this city for larceny. Later he was arrested at a house in Johnson Falls. His next escapade was in Springfield, Mass., where he gained access to a house in the suite of a telephone inspector. When discovered he jumped from second story window and was badly injured. A few days ago he again made his appearance here leaping from house to house.

Last night after being placed in jail he tried to escape by the window. Finding the window painted with the officers' question the lad, who said that he had done it to get fresh air. How he accomplished this is a mystery. As the window is set in a bare wall high above reach.

She Was Pleasantly Surprised.

Miss H. E. Bell, Winona, Wis., writes: "Before I commenced to take Foley's Kidney Pills I had severe pains in my back, could not sleep, and was greatly troubled with headache. The first few doses of Foley's Kidney Pills gave me relief, and two bottles cured me. The quick results surprised me, and I can honestly recommend it to all." J. W. O'Sullivan, 24 Church street.

FORGERIES TOTAL \$125,000

Town Treasurer of Framingham Pleads Not Guilty from His Sick Bed.

Framingham, Mass., Oct. 19.—In bed at his home here today, Town Treasurer John H. Lombard pleaded not guilty to a charge of forging two documents, purporting to be notes of the town, amounting to \$25,000 and was held in \$20,000 bonds for the superior court. His wife and Edward F. Merriam furnished the securities.

Earlier in the day in Boston the two Boston brokers arrested yesterday for alleged connection with the case, Charles S. Cummings and Edward A. Mead, were held in \$20,000 and \$5,000 bonds respectively for the grand jury on the charge of larceny of \$24,122 from the Franklin Savings bank.

An official of the town of Westwood, formerly of Framingham today told notes of \$25,000 and \$5,000 respectively in which there were certain signatures which Framingham town officials pronounced forgeries, and a little later two men, who refused to disclose their identities, brought two other notes of like amounts, which were also declared to be forgeries.

The police officials are withholding the names of the men whom Lombard says received the benefit of the sale of these securities.

That the alleged forgeries appropriate \$25,000 was the statement of a leading town official tonight. The official said also:

"God only knows how many forgeries were committed. Allow me to make a prediction. When this affair is completed it will be found that the parallel was never revealed in Massachusetts. However, I am confident that the town will not lose a single nickel. The authorities now have a list of all the notes that do not appear in the town books."

DIG LOSS, WATER AND SMOKE

The Lyndonville Furniture Store of Dodge & Watson Had a Close Call.

Lyndonville, Oct. 19.—A fire late this afternoon, started in the upholstery store, basement of Dodge & Watson's furniture store, endangered the building which also includes the Union Journal printing office and several tenements. It is quite probable that the fire originated from the furnace.

Denise came owing to the highly inflammable nature of the contents of the basement made the work of the firemen difficult but the high pressure gravity water system drowned out the fire confining it to the basement. Considerable damage was done to the stock by water and smoke. The loss cannot be estimated tonight. The firm carried a stock valued at \$50,000 or more, partially insured.

COOK STEALS MARCH ON PEABY.

Discoverer of the Pole Uses Talking Machine to Give Public at First Hand the Story of His Exploit.

Camden, N. J., October 18.—Although Dr. Cook has been out of touch with the world for a number of years, it did not take him long upon his return to recognize the exceptional opportunity the talking machine offered for getting the story of his arduous and thrilling journey before the whole American public. Almost as soon as Dr. Cook set foot in this country he made a record for the Victor Talking Machine company, and this intensely interesting four-minute talk on "How I Reached the North Pole" has just been issued and will take the great Arctic explorer's own story right into the homes of the people in every part of the world. Similarly enough, the name of the talking machine, which was selected by Dr. Cook in the dash for the pole, is the Victor.

WITH BOYS SAVED.

Louis Boon, a leading merchant of Norway, Mich., writes: "Three bottles of Foley's Kidney Pills absolutely cured my boy of a severe cold, and a neighbor's boy, who was so ill with a cold that the doctor gave him up, was cured by taking Foley's Kidney Pills." Nothing else is as safe and certain in results. J. W. O'Sullivan, 24 Church Street.

COLORS OF NATURE.

Shown in Exhibit of Pictures at the Fletcher Library.

An exhibition of pictures made with the Lumiere autograph plates will be given for the next ten days at the Fletcher Library. The plates, which are nearly mounted, are arranged in the windows and in lectures. As it is necessary for one light to strike through the plate in order to bring out the picture.

The exhibit consists of 22 views of Yellowstone Park and the Canadian Rockies, together with views taken in Vermont. Those of the University of Vermont are especially fine. A large number of the plates are placed in the windows of the natural color stage. By a chemical process the natural color is brought out. Color photography is now a fact beyond question. The only drawback is that prints cannot be made from the colored plates. Dr. Perkins is of the opinion that this difficulty will only be surmounted by an entirely new invention.

CELEBRATION AT YORKTOWN

Every Auto for Miles around Carried Folks to Where Lord Cornwallis Surrendered.

Yorktown, Va., Oct. 19.—On the historic ground where Lord Cornwallis sealed the doom of British rule over what is now part of the United States on this date 125 years ago, patriotic Americans gathered today here to celebrate the anniversary of that famous surrender which put an end to the Revolutionary War. The exercises were held under the auspices of the descendants of the signers of the declaration of independence, the Yorktown Historical society of the United States and the citizens of York town.

The inaccessibility of the place made the attendance comparatively small. More than ten miles from any railroad, Yorktown is practically without direct connection with the outside world save for an occasional steamer from points down the York river. Today every automobile within a radius of 20 miles was pressed into service and excursion steamers from Norfolk, Newport News and Point Comfort took care of the thousands of sightseers.

Four companies of coast artillery from Fort Mifflin and a detachment from the Atlantic torpedo fleet participated in the celebration. The exercises opened with the marking of an historic spot by a special committee from the Yorktown Historical society. The places marked included the old Nelson house, the custom house which was the first in the United States, the old Grace Episcopal Church, the third of that denomination to be erected in the country, the British fortifications and the redoubt captured by the American and French forces on the night of October 14, 1781.

The principal event of the morning was a parade of the school children of York and surrounding counties. They ended at the grandstand at the Nelson house where the exercises of the day were concluded.

Representative J. Hampton Moore of Pennsylvania, president of the Atlantic Deepwater Ways association, delivered the principal address.

BRADSTREET'S WEEKLY VERMONT TRADE REPORT.

Reports to Bradstreet's for the week ending favorable regarding volume of business. Labor is well employed. Percentage of idle men is less than it was a year ago and prospects are that more men will be employed as the season advances. Warm, pleasant weather while not suitable for sales in winter clothing, has brought out a fairly good number of shoppers at a fairly good price for the conditions. Additional reports from running factories show early frosts and late season in northern part of the State has lessened the lack of corn also blueberries. Later corn was considerably below an average yield. Reports from state producing districts show potatoes among leading crops meeting the best two months two new companies were formed and another is in prospect. Sales of roofing slate are not as heavy as a year ago but amount engaged is sufficient to keep quarries operating full time. Prices on this article are holding firm. Mill stock men report condition more or less normal. Right grain in demand over that of two months ago. Reserve stocks are accumulating some prices are unsettled for this grade. Reports from woolen mill sections give more business being done than for two years previous. Demand for lumber is fairly well sustained all over the State. Reports for week include one involuntary bankruptcy.

Burlington reports manufacturing plants operating full time, manufacturers of garments note orders are coming in well. Retail merchants speak well of sales, although colder weather would improve trade. Retail trade is better than expected. The work of remodeling large marble plant is well under way. Machine industries are also extending their plants. Maple activity is reported among retail trade. St. Albans reports a gradual improvement in general condition, although collections are slow below an average. Reports from retail merchants at St. Johnsbury show warm weather has caused a slackness in general trade, although labor is better employed. Granite manufacturers at Barre note but little change in general conditions and retail trade is fairly good. Metal merchants report seasonable trade fairly good. Aside from granite manufacturing business, industries are well employed. A little more activity is reported among knit goods mills at Bennington. Merchants are looking for a better winter trade than they have a year ago. Bellows Falls reports a better condition among manufacturing interests is but little changed. Brattleboro reports manufacturing industries fairly well employed. Reports from retail merchants at Brattleboro show a better condition. Reports from Poultney show considerable building work has been done the present year, slate quarries are well employed. Reports from agricultural districts in this section state the potato crop is the largest they have had for years. Early reports labor better employed than it has been for two years. The outlook among retail merchants is said to be much better.

ANNAPOLIS QUARTERBACK HAS BROKEN VERTABRAE

Annapolis, Oct. 18.—An X-ray examination made today on Middlebury East D. Wilson, who suffered an injury to his back in last Saturday's football game with Villa Nova, disclosed a fracture of the right vertebrae. He has been paralyzed since he received the injury. An operation it is believed will be the only means of affording him relief.

Foley's Kidney and Liver cleans the air passages through the trachea in the throat, soothes the inflamed membranes, and the most obstinate cough disappears. Sore and inflamed lungs are healed and strengthened, and the cold is expelled from the system. Refuse any but the genuine in the yellow package. J. W. O'Sullivan, 24 Church Street.

Domestic Science

By Emma Paddock Telford.

America, from the broad breast
It springs, beneficent and bright,
Of all the gifts from heaven the best,
For the world's succor and delight.

Then do it honor, give it praise;
A noble emblem should be ours;
Upon their fair shield set thy maize,
More glorious than a myriad flowers.

And let thy States their garlands bring,
Each her own lovely blossom bring,
But leading all let Maize be king,
Holding its place by right divine.

While scientists and doctors are falling foul of each other in their expressed opinions about the origin of the new-to-Americans disease, pellagra, some claiming it is caused by eating corn that has been altered by fermentation, I think we may go on eating this great American staple without let or hindrance. It goes without saying that any food, animal or vegetable, should be in good condition before being introduced into the system. Because oysters or fish give poisonous poisoning or typhoid when past their freshness or fattened in impure water, must we give up fish in food? Because milk from a diseased cow or dirty farm can convey typhoid shall we eliminate milk from our diet? Must all water be tabooed, because there are fouled springs that in many instances have carried disease and death to the consumer? If salads are open to suspicion when improperly prepared or served, should we give up the whole family riched when they enjoy the whole family of salad? Is it not the whole family riched when they enjoy the whole family of salad? Is it not the whole family riched when they enjoy the whole family of salad?

Life saving and healthful. Corn is not the first vegetable that has fallen under suspicion, and that unjustly. A few years ago the tomato was charged with responsibility for the increase in cancer. Potatoes and egg plant have had their detractors, cabbage has been spoken of as too heavy, and turnips as a food unfit for food, bringing on rickets and malnutrition in the wake of its consumption. Our native Indians were strong and stalwart until made acquainted with the white man's fire water, the white man's adulterated baking powder and depleted flour, and corn has always been recognized by him as the "gift of the Great Spirit."

Among the timely dishes of corn are the following—some new, some old, but all good.

GRANDMOTHERS' GREEN CORN CAKES.

Mix one pint of grated sweet corn with three tablespoonsful of milk, a scant cupful of flour, a teaspoonful of salt, a beaten egg, and one well beaten egg. Drop this mixture by the spoonful into the frying pan well greased with butter. Serve with meat for dinner.

BROWN CORN FOR THOSE WHOSE DIGESTION IS IMPAIRED.

Cut the raw corn from the cob by scoring each row and pressing out the pulp with the back of a knife. This gives all the milk the corn but leaves the hulls on the cob. Have a sheet from the hulls on the cob and sprinkle a little salt on the bottom. As soon as it browns, put the corn cut from two cobs in the pan, pressing the kernels with a spoon so as to extract the milk. In a moment it will commence to break in its own juices. Keep stirring and when well browned add water until it commences to stick. Add another spoonful of water until four or five have been added, watching closely to avoid scorch. This method of cooking gives a rich and delicate gravy. Serve very hot. This is a stock California sanitarium diet and is permitted patients who cannot eat corn as generally prepared.

CORN FRITTERS.

These are a favorite garnish for fried or roast chicken or Belgian hare. To one cupful fresh sweet corn cut from the ear, add a half cupful of crumbed milk mixed with a half cupful of milk. Add two well beaten eggs, yolks and whites, whipped separately, and season with salt and pepper. Have a hot sheet from the hulls on the cob and sprinkle a little salt on the bottom. As soon as it browns, put the corn cut from two cobs in the pan, pressing the kernels with a spoon so as to extract the milk. In a moment it will commence to break in its own juices. Keep stirring and when well browned add water until it commences to stick. Add another spoonful of water until four or five have been added, watching closely to avoid scorch. This method of cooking gives a rich and delicate gravy. Serve very hot. This is a stock California sanitarium diet and is permitted patients who cannot eat corn as generally prepared.

CORN MOCK OYSTERS.

Grate one dozen ears of green corn, then mix with the pulp and the yolks of four eggs. Beat and mix well. Season with salt and pepper. Have ready over the fire a round bottomed kettle with equal quantities of lard and butter. When smoking hot drop in a spoonful of the corn batter, as near the size of oysters as possible. They should be fried in an inch thick and fried to a rich golden brown.

CORN AND CELERY FRITTERS.

Mix one cupful raw pulp corn with an equal quantity finely chopped celery, and season with a half teaspoonful salt and a quarter of a teaspoonful of pepper. Add two eggs, whites and yolks beaten separately, and three tablespoonsful of flour sifted with one teaspoonful of baking powder. Drop by spoonfuls into a little hot butter and lard mixed, and fry quickly. If the batter seems too thin, add more flour.

NANTUCKET GREEN CORN PUDDING.

Select firm, sweet ears of good size and husk and shuck kernels, take out the pulp without including any of the hull.
